

LIFE ON CAMPUS

İbrahim Çeçen University of Ağrı is a living area with a modern campus, with its rich green texture, technologically equipped buildings and sports facilities, which is capable of meeting of all the needs of the students. Our campus, built on 2000 acres, comes to the forefront with its green spaces, clean and well-kept surroundings, regular traffic and a safe environment. The dormitories affiliated to Credit and Dormitory Institution located inside and outside the campus have a capacity of approximately 6000 students. In addition to the private student dormitories in the city center, the İbrahim Çeçen Foundation built a 300-student dormitory in the campus. In addition, İbrahim Çeçen Foundation grants success and support scholarships to the students, and students who successfully represent our university in culture, arts and sports contests and events within the year are awarded. Ağrı İbrahim Çeçen University is a university where students are well-educated. We prepare the students as individuals who own national and moral values, opens new horizons and integrate science love with its motto *"the light rising from the east."*

"the light rising from the east"

VOCATIONAL HIGH SCHOOL

In 21st century, the basis of development and progress of a country is to train qualified workforce with knowledge, skill and work habit. For this reason, vocational schools are of great importance in our country, as in the world.

In addition, we keep our programs developed and dynamically maintained according to both the changing needs of the world and "Curriculum Development in Education" technique, and also new programs are opened according to the emerging needs. With the awareness of the practice and entrepreneurship, our vocational high school which trains not "individuals who seek job, but individuals that are wanted" is proud of its every graduate with knowledge and professional skills..

PATNOS VOCATIONAL HIGH SCHOOL

The most important shortcoming in our country in terms of human resources is the inadequacy of "qualified staff" in the sectors. The qualified staff is the most important factor for the development of our country as much as it is for the sectors and it is very important for the efficient use of the resources in the economy. The work to open new departments and programs in addition to existing departments according to the demands of the sectors particularly in the region are kept up-to-date.

Our Vocational High School aims to train qualified intermediate manpower which is needed by the region and our country as well as to train individuals who are informed and equipped with knowledge about technology, are aware of their duties and responsibilities towards the society, and take as principle to work in accordance with the job definition.

Departments

Computer Programming
Biomedical Device Teknology
Pharmacy Services
Construction Technology

Civil Defence and Firefighting

CIVIL AVIATION VOCATIONAL HIGH SCHOOL

The rapid growth in the aerial transportation sector in our country in recent years has also brought the need for qualified human resources. The need for qualified human resources in the aviation sector has increased even more, as a result of new airline companies entering the market, growing companies' fleets, increasing the number of airports in our country and making new additions to existing airport capacity to meet the rapidly increasing demand for passengers.

The main objective of the Civil Aviation Vocational High School is to train staff who are prone to team work, who are focused on solutions, who have effective communication skills, who are dynamic and operational in order to meet the demand for expert personnel in parallel with the growth in the aviation sector. We believe that the Civil Aviation Vocational High School opened in our university will play an important role in meeting the human resource needs of the aviation industry.

CENTRAL RESEARCH AND APPLICATION LABORATORY

The center enables to utilize from all kinds of equipment, instruments and devices with the R&D opportunities. While carrying out advanced scientific studies and researches, the laboratory provides a significant base that would support the master theses and dissertations of the scholars of our institutions and the academicians of other universities that are related with the development of the region.

2
Founded in 2010, Central Research and Application Laboratory has 3200 m² closed areas. The central laboratory has been accredited on the date of 22/01/2014 as a result of supervision that was carried out by TÜRKAK according to the TS EN ISO/IEC 17025:2017 standards and has been checked and evaluated annually by the related institutions in the framework of regulations and notices. Beside the advanced scientific studies, the central laboratory has planned to analyse upon 4 fundamental fields, such as water, food, oil and solid fuel in the scope of regional development.
