

Ağrı Vocational School

The Vocational School which has been active since November 2nd2011, started to conduct courses with 225 students and increased its capacity to 500 students in 2009-2010 academic year. The school has experienced remarkable achievements in terms of physical and technical improvements and has developed a brand-new image.

The educational activities in the Vocational School are conducted in a manner that reflects up to date conditions. Every day, we work to obtain modern and up-to-date classroom equipment and educational tools.

We have computer labs, technical drawing rooms and classes equipped with PCs and projectors for our students.

In addition to scientific studies, the vocational school also organizes social, cultural and sport activities. It is an undeniable fact that such activities have a positive influence on students. Providing sympathy, tolerance, solidarity and cohesion, these activities are source of morale for students and staff. It is our pleasure to help students who deserve the best quality at our school.

The Vocational School has 500 students, 12 academic staff and six administrative staff. The school has 10 classrooms, three computer labs, a technical drawing room and an accounting room. Further, we have an internet room, a guestroom, a conference hall, a canteen and a volleyball court.
